

HASAN AHMED ANSARI

FULL-STACK WEB DEVELOPER | MERN STACK | NEXT.JS

Pakistan | Open to Remote / International Opportunities | Phone: +92 334 1834018 | Email: hasanahmed.agency@gmail.com

PROFESSIONAL SUMMARY

Full-Stack Web Developer with 1+ years of professional experience at Softseek International (June 2025 - Present), specializing in the MERN Stack and Next.js. Experienced in building responsive, production-oriented web applications, SaaS and e-commerce platforms, real estate and car-rental systems, REST APIs, authentication and authorization, admin dashboards, payment integrations, CMS-driven interfaces, multi-tenant architecture, and cloud deployments. Strong hands-on focus across frontend, backend, databases, UI/UX implementation, API integration, Git-based development, and end-to-end delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js (App Router), Tailwind CSS, Bootstrap, Framer Motion, AOS, Context API

Backend: Node.js, Express.js, REST APIs, o9JWT, bcryptjs, role-based access control

Databases: MongoDB, Mongoose

Integrations: Cloudinary, Google OAuth, third-party REST APIs, file/image uploads

Tools & Deployment: Git, GitHub, Vercel, Netlify, Render, environment configuration, API testing/debugging

Engineering: Responsive design, reusable components, form validation, search/filtering, admin dashboards, CMS, multi-tenancy, PWA concepts, performance-oriented UI, deployment and troubleshooting

PROFESSIONAL EXPERIENCE

Softseek International | Full-Stack Web Developer

June 2025 - Present

- Develop and maintain full-stack web applications using MERN technologies and Next.js, translating business requirements into responsive user-facing features and backend services.
- Build reusable React/Next.js interfaces with modern component architecture, Tailwind CSS/Bootstrap, responsive layouts, animations, forms, filters, search, and polished UI/UX.
- Develop Node.js and Express.js REST APIs connected to MongoDB/Mongoose and integrate authentication, authorization, role-based access, data validation, and secure password handling.
- Implement application modules such as e-commerce catalogs, carts and checkout flows, real estate listings, car-rental workflows, admin dashboards, CMS features, and booking/inquiry systems.
- Work with third-party services including Stripe, Cloudinary and OAuth-based login; manage environment variables and production deployment workflows across Vercel, Netlify and Render.
- Use Git and GitHub for source control, branching and collaboration, while debugging production issues, API failures, deployment problems and environment/configuration issues.

Ezitech Institute | Full-Stack Web Development Trainee

3-Month Professional Training | Certificate

- Completed hands-on full-stack web development training covering frontend, backend, databases, APIs and practical application development.
- Built and practiced projects using JavaScript, React, Node.js, Express.js, MongoDB, authentication patterns and Git/GitHub workflows.
- Strengthened fundamentals in responsive UI development, CRUD operations, REST APIs, debugging and deployment-ready application structure.

SELECTED PROJECTS

Full-Stack E-commerce Platform - MERN, JWT, Stripe, Cloudinary, MongoDB

Multi-store e-commerce architecture with tenant-aware data, user/admin/manager roles, product management, reviews and ratings, cart, authentication, multiple admin capabilities, and admin dashboards.

Caryaati Car Rental Platform - Next.js, TypeScript, REST APIs, Laravel/PHP, MySQL

Car-rental platform with vehicle listings, location and airport flows, filters, booking/inquiry workflows, vehicle details, vendor-specific themes, CMS-driven homepage sections, admin/vendor functionality and API integrations.

Luxury Dream House - Full-Stack Real Estate Project - Next.js, Node.js, MongoDB, Admin Dashboard

Luxury single-tenant real estate experience with listings, calls-to-action, multi-page content, animated UI, admin dashboard concepts and API integration. Live demo: luxurydreamhouse.netlify.app

Full-Stack Real Estate Website on Next.js - Next.js, Node.js, MongoDB

Real estate website with property listings, filtering, API integration, contact/about pages, admin panel/dashboard functionality and modern responsive UI.

Luxe AR Commerce - Electronics E-commerce - Full Stack, Payments, Search, Filters

Luxury electronics commerce concept with product browsing, cart, payment integration, search, filtering, dark mode and modern responsive design.

Modern Restaurant Web App - MERN Stack, API Integration

Modern restaurant web experience with menu browsing, food details, search, filters, contact/about sections and API-backed content.

Luxe Car Wheels - Car Rental App - Web Application, Listings, Filters

Car-rental focused application design with vehicle listings, homepage search/filtering and a polished automotive user experience.

3D Animated Portfolio - Next.js, React

Interactive developer portfolio presenting projects, skills and experience through modern responsive sections and animated/3D-oriented visual design.

ADDITIONAL PROJECTS & PRACTICE WORK

Caryaati AI Website Design - Next.js, Tailwind CSS

Luxury AI-focused website design with responsive layouts, modern typography, strong visual hierarchy and product-oriented sections. Live demo: about-ai-mauve.vercel.app

Demo Trading Design on React - React, Tailwind CSS

Trading dashboard interface with market-style visuals, responsive layout and reusable UI components. Live demo: demo-trading-nine.vercel.app

Staging Website - Frontend Web Development

Modern multi-page frontend website focused on visual presentation, responsive layouts, navigation and reusable content sections.

Ababeel Social Media App - Next.js, Cloudinary, Context API

Instagram-style social platform concept with media posts, image uploads, client-side state/context and persistent theme preferences.

Employee Management Tool - React/Next.js, Express.js, MongoDB

Employee management application with frontend workflows and a separate Express/MongoDB backend structure for data operations.

GITHUB & DEVELOPMENT PORTFOLIO

GitHub: github.com/Abdullah0332 - public repositories include ECommerce-Firebase, Memories-Project, Chatbot-NodeJS, node-application and CRUD-Nodejs-MongoDB, alongside additional development work. The profile is a useful code reference for recruiters and technical reviewers.

Portfolio: abdullah-portfolio-three-phi.vercel.app - includes live project showcases such as the 3D Portfolio, Demo Trading Design, Caryaati AI Design, Luxe Car Wheels, Luxe AR Commerce, Modern Restaurant, Real Estate projects and Staging Website.

CORE DEVELOPMENT STRENGTHS

- End-to-end full-stack development from responsive frontend UI to backend APIs and database design.
- Modern React and Next.js application development, including App Router patterns and reusable component-based architecture.
- MERN-based authentication, authorization, role management, CRUD systems and admin dashboard development.
- E-commerce workflows including products, carts, reviews, checkout and media uploads.
- Real estate and car-rental domains including listings, filters, booking/inquiry flows, CMS content and location-based pages.
- Deployment and maintenance using GitHub, Vercel, Netlify, Render and PM2, with practical debugging of production configuration and API issues.
- UI/UX implementation with responsive design, animations and modern design systems while keeping code maintainable and reusable.

EDUCATION

BS Software Engineering (Final Year) - Virtual University

B.Com - Government Ghazali College (2021)

ICAP (Partial) - Accounting & Finance

Professional Certificate: Full-Stack Web Development Training - Ezitech Institute (3 months)
